Minimum Guidelines for Contractor OCIP Health and Safety Plan (HASP)

PART 1 -GENERAL

1.01 SECTION INCLUDES:

- A. Requirements for safety, including:
 - 1. Health and Safety Plan (HASP)
 - 2. Daily Safety Report
 - 3. Safe Work Plan
 - 4. Safety Personnel
 - 5. Accident and Incident Notification
 - 6. Safety Orientation
 - 7. Safety Meetings
 - 8. Maintenance of Safety Records
 - 9. Hazardous Material Labeling and Storage
 - 10. Personal Protective Equipment

1.02 CITED STANDARDS:

- A. Occupational Safety and Health Administration Standards (OSHA)
- B. American National Standards Institute (ANSI)
- C. Factory Mutual (FM)
- D. Underwriters Laboratory (UL)
- E. Compressed Gas Association (CGA)
- F. National Fire Prevention Association (NFPA)
- G. Americans with Disabilities Act (ADA)
- H. New Jersey Turnpike Authority Manual for Traffic Control in Work Areas

1.03 NOTED RESTRICTIONS:

- A. Notice to Proceed may be issued but no contract Work shall commence until the HASP has been submitted.
- B. Contractor shall conduct Safety Orientation prior to getting on the job site.
- C. Failure to have the Competent Person at a work area may result in a stoppage of Work at that work area.
- D. The Contractor shall not change the approved Safety Representative without prior written

- notification to the Engineer.
- E. The use of explosives shall not be permitted on Authority's property without prior approval of the Chief Engineer.

1.04 DELIVERABLES:

- A. Submit Safe Work Plan as defined in Section 2.03 to the Engineer for review at least one week prior to the Progress Meeting.
- B. Written records of each Worker Safety Meeting (such as tool box talks or tailgate meetings), including the topics covered.

PART 2 -PRODUCTS

2.01 HEALTH AND SAFETY PLAN (HASP)

- A. The HASP shall contain as a minimum:
 - 1. Cover page with name of Contractor, Title of Contract, and Contract number. Include plan revision number, date of revision, name and signature of Safety Representative.
 - Table of contents listing each section and exhibit that clearly identifies the revision number and date of each section and exhibit
 - 3. Safety Policy Statement signed by an Officer of the Contractor.
 - 4. Organization chart of Contractor and subcontractor personnel responsible for implementing the HASP and their duties and responsibilities. The chart shall show the reporting relationship and integration of the Safety Representative with all personnel, including top-level managers, responsible for implementing the HASP.
 - 5. Description of Safety Representative's duties and responsibilities and evidence that the Safety Representative meets the requirements specified under 3.03 Safety Personnel.
 - A Site inspection procedure to ensure that a walk-through of the Site is conducted daily for each work shift and recorded in a Daily Safety Report. Include copy of Report form.
 - 7. An accident investigation procedure including a decision chart for identifying root causes. Include accident investigation form(s).
 - 8. A plan for the safe and effective response to medical emergencies for Contractor and subcontractor personnel. Emergency medical services shall include first-aid treatment (including all necessary first aid supplies), and ambulance service (or other standing arrangement) for the immediate transport of injured workers to medical treatment.
 - 9. An evacuation plan that designates one or more assembly areas for personnel and ensures that each person is accounted for in the event of fire or other such emergency.
 - 10. A list of emergency phone numbers which shall identify the proper numbers to call for all emergencies including fire, police, medical (hospital, clinic, ambulance), and the release of contaminants into the environment.
 - 11. Disciplinary procedures for violations of safety rules.
 - 12. Describe method of abating Blood Borne Pathogen exposures.
 - 13. A detailed safety orientation plan for Contractor and subcontractor personnel, including:
 - Description of the Work;
 - Review of Safety Policy Statement;
 - Discussion of general safety rules with a copy of the rules distributed to each employee;
 - Procedure for notification of accidents, injuries and incidents;
 - · Location of First Aid, eye wash stations and Medical facilities;
 - Specific Site hazards and safe work practices;
 - Review of public safety concerns;
 - Attendance requirements at Worker Safety Meetings;
 - Personal Protective Equipment requirements;
 - Substance abuse policy;

- Baseline Medical Monitoring requirements for lead exposure.
- Fire prevention requirements;
- Review of hazardous communication program;
- Housekeeping requirements;
- Construction equipment safety;
- Vehicle safety;
- Warning devices and safety postings; and
- Disciplinary procedures.
- 14. Outline of general safety rules and procedures for the performance of the Work. The Contractor shall ensure that all applicable safety regulations are addressed and included in this section. Examples for inclusion in this section are as follows:
 - Hazcom Program,
 - Hearing Conservation Program,
 - · Respiratory Protection Program,
 - Confined Space Program
 - · Use and storage of compressed gases and
 - Control of Hazardous Energy Sources (Lock-out/Tag-out)
- 15. Outline of site-specific safety rules and procedures for the performance of the Work. Examples for inclusion in this section are as follows:
 - Public protection,
 - Plans for fire protection and emergency response, and
 - Plans for Lead and Asbestos Abatement.
 - Plans for Dust Control/Silica Exposure
- 16. A plan for site security including prevention of unauthorized entry onto the Site and prevention of vandalism. This plan shall include where necessary one or more of the following: use of fencing, barricades, signs, guard service, and worker identification.
- 17. Any other related safety information.
- 18. Submit HASP to the Engineer and Turnpike Authority's designated OCIP Safety Coordinator.

2.02 DAILY SAFETY REPORT

The Daily Safety Report is a report that details all safety related activities and issues observed during the work shift.

- A. The Daily Safety Report shall include at a minimum:
 - 1. A header stating;
 - Title of Contract and Contract Number,
 - Date.
 - Time of shift,
 - Work area(s) inspected, and
 - Weather conditions.
 - 2. An entry for each safety deficiency that includes;
 - Location and nature of deficiency, unsafe act or unsafe condition
 - Time noted,
 - Names of persons and firms that were notified of the deficiency including time notified:

- Time and nature of corrective action(s).
- 3. An entry for each deficiency that was not corrected on the prior shift's Daily Safety Report until the deficiency is corrected;
- A notation of each accident, incident, or injury reported including name of injured party or affected property owner; time of accident, incident, or injury, and description of accident, incident, or injury;
- 5. Notation of Safety Meetings conducted and attended including type of meeting and the name of each person in attendance;
- 6. A notation of visits by safety representatives of the Authority, State or Federal Authorities, including name and phone number of representative, time of visit, and department or authority represented; and
- 7. Name and signature of person completing the report.
- 8. Daily Safety Report shall be submitted on a weekly basis to the Engineer and the Authority's designated OCIP Safety Coordinator.

2.03 SAFE WORK PLAN

- A. The Safe Work Plan (SWP) is a written work plan that identifies types of activity or operations to be performed, the method of work for performing each activity, the associated work hazards, and the corresponding equipment and methods that will be used to prevent accidents. The SWP shall define a plan of action for each identified hazard including comprehensive prevention methods for exposures to workers, the public, property, and the environment. At weekly Progress Meetings, the SWP will be reviewed. Activities not previously identified will require that a SWP to be developed and submitted.
- B. Each primary construction activity on the Progress Schedule shall be identified and described in the SWP with corresponding sub-tasks as appropriate. The following headings should be used for the SWP.
 - 1. Primary Task:

Describe scope of work.

2. Work Element(s)

Describe sub-tasks and activities of the Primary Task, as appropriate. Identify the equipment and methods of construction for the Work Element.

3. Hazard Description

Describe each foreseeable hazard for the Work Element

- 4. Accident Prevention Methods
 - Describe controls and procedures that will be implemented to reduce or eliminate each foreseeable hazard described above; reference attachments as necessary. When controls are compliance based, such as for confined space entry, all applicable compliance information shall be included or appropriately referenced. Of particular concern are training items that will be required to educate the employees about exposures such as Tool box meetings held to discuss the hazard and accident prevention methods. More formal training (offsite, confined space, trenching competent person, etc) should be listed and documentation referenced or provided.
 - Priority should be given as follows in controlling hazards: 1.) Elimination of the hazard.
 2.) Engineering controls. 3.) Provision of Personal Protective Equipment (PPE). 4.)
 Management controls / training, such as a safety monitor for falls exposures.

- Accident prevention procedures shall be based on industry standards including, but not limited to:
 - . OSHA Standards
 - . Mine Safety and Health Regulations.
 - . American National Standards Institute (ANSI)
 - . National Fire Protection Association (NFPA)
 - . American Conference of Governmental Industrial Hygienists (ACGIH).
- Absence of an applicable standard or regulation does not preclude the Contractor from providing appropriate controls within a SWP.
- Such occurrences may be governed by the OSHA Act General Duty Clause, 5 (a) 1. Specific references in the SWP to codes standards and regulations are not necessary.

PART 3 - EXECUTION

3.01 SAFETY RESPONSIBILITIES:

A. The safety of the motorists and other persons, Authority employees, employees of the Contractor and its subcontractors, as well as protection of property and the environment, shall be a primary concern of the Contractor. The Contractor shall assume the full responsibility and obligation to provide a safe working environment at all times and shall maintain a safe, clean, and healthy worksite.

3.02 HEALTH AND SAFETY PLAN (HASP)

- A. The Contractor shall develop and maintain a Health and Safety Plan (HASP) to:
 - 1. Protect the lives and health of all persons;
 - 2 Prevent damage to the property of others; and
 - 3 Prevent damage to the environment.
- B. Each subcontractor shall comply with the Contractor's HASP.
- C. Should an accident or incident occur, the Contractor shall take immediate action to prevent the recurrence of each accident or incident. in addition, the Contractor shall review the HASP based on such an occurrence and revise as necessary. Upon any changes in work conditions, the Contractor shall also revise the HASP. The Contractor shall submit each revision of the HASP to the Engineer and Authority's designated OCIP Safety Coordinator.

3.03 SAFETY PERSONNEL

- A. Safety Representative (SR):
 - 1. A SR is an employee of the Contractor. The SR is required to have at least 5 years heavy construction experience in the type of work of the contract with at least 2 years in a supervisory capacity. The SR shall have completed a 30 hour OSHA Construction Safety and Health course.

Resume and certificates demonstrating the SR's qualifications shall be submitted to the Engineer for review and acceptance.

2. Duties of the SR include, but are not limited to;

- a. Primary role is contract safety.
- b. Is key contact person for all safety-related issues for the Contractor.
- c. Person must be reachable 24 hours a day.
- Responsible for designating a Competent Person for each work operation for each shift.
- Ensure an alternate SR is designated for time when primary SR is unavailable vacation, sick, etc.
- f. Shall be familiar with the work being performed, shall be competent to instruct others, and shall be familiar with HASP.
- g. Safety Representative shall have the authority to order the work to be stopped in the affected area if an unsafe condition is identified.
- 3. The requirement for a full time SR will be determined during the Design Phase on an individual contract basis. If determined to be required, Section 104.13 Sanitary, Health and Safety Provisions of the Standard Specifications will be supplemented accordingly.

B. Competent Person (CP):

1. A CP is an employee or designee of the Contractor. The CP is required to have at least 3 years heavy construction experience and at least 1 year in a supervisory capacity in the designated work operation to which they are assigned. CP shall be given the authority to assure corrective action is accomplished. The CP shall have completed a 30 hour OSHA Construction Safety and Health course.

Resume and certificates demonstrating the CP's qualifications shall be submitted to the Engineer for review and acceptance.

- 2. Duties of the Competent Person include, but are not limited to:
 - a. A Competent Person shall be familiar with the work being performed.
 - b. A Competent Person shall be competent to instruct others.
 - c. A Competent Person shall be familiar with the HASP.
 - d. A Competent Person shall have the authority to order the work to be stopped in the affected area if an unsafe condition is identified.
- C. All workers shall have successfully completed the 10-hour OSHA course on Construction Safety and Health (29 CFR 1926).

3.04 ACCIDENT AND INCIDENT NOTIFICATION

- A. The Contractor shall immediately notify the Engineer of each accident involving personal injury, causing damage to property or the environment, or affecting the safe movement of traffic. The Contractor shall transmit copies of the required Accident Investigation Report(s) to the Engineer and the Turnpike Authority's designated OCIP Safety Coordinator within 24 Hours of each accident (refer to OCIP Manual for further directions).
- B. In the event of a serious accident, the Safety Representative shall convene an accident investigation meeting as soon as reasonably possible, which shall include the Engineer and the Authority's designated OCIP Safety Coordinator for the purpose of determining the cause of the accident and actions to be taken to prevent a recurrence of such an accident. Information derived from the accident investigation meeting may result in changes to the HASP, which shall be immediately revised and submitted to the Engineer and the OCIP Safety Representative.
- C. A Serious Accident shall be defined as an accident or incident that reflects more than \$100,000 in property damage, causes death, or causes serious injury, which shall include but not be limited to:
 - 1. Fatalities,
 - 2. Spinal cord injuries,
 - 3. Burns to 10% of more of the body,
 - 4. Amputations or crushing injuries,
 - 5. Eye injuries causing partial of full loss of sight,
 - 6. Injuries causing loss of hearing,
 - 7. Severe head injuries,
 - 8. Any occupational disease
 - 9. Any occurrence resulting in hospitalization. and
 - 10. Any injuries as a result of falls and electrocutions.

D. OSHA shall be notified in the event of a fatality or multiple (3 or more) hospitalizations. E. In the event of a spill (or release) of a reportable quantity of a hazardous material, Contractor shall immediately notify the appropriate authorities having jurisdiction and the Engineer. The Contractor shall be responsible for statutory reporting and shall bear all costs for immediate clean-up and disposal of spilled materials or liquids.

3.05 UNSAFE CONDITIONS

A. An Unsafe Condition is a condition that gives rise to the imminent possibility of Serious Injury to workers or the public, of serious damage to property or the environment, or of affecting the safe movement of traffic. When an Unsafe Condition exists, work shall be stopped by the Engineer following notification by the Safety Representative. If the Contractor does not take corrective action immediately, or within the time period specified by the Engineer, the Contractor shall not be permitted to resume work until corrective action is performed.

3.06 FITNESS FOR DUTY

A. The Contractor shall not permit a worker whose ability or alertness is impaired because of drugs, fatigue, illness, intoxication, or other conditions to work at the Site. The Contractor is encouraged to have a substance abuse program, preemployment drug testing, and testing for cause.

3.07 EMPLOYEE CONDUCT

A. The Engineer shall have the right to refuse access to the Site or require immediate removal from the Site any individual violating site safety or security regulations.

3.08 SAFETY ORIENTATION

A. Prior to working on Site, each employee shall undergo safety orientation as outlined in this Section. Orientation sign in sheets and orientation employee numbers shall be made available to the Engineer upon request.

3.09 SAFETY MEETINGS

- A. Worker Safety Meetings
 - Worker Safety Meetings shall be held no less than once each week. Each employee of the Contractor and each subcontractor working at the Site shall attend these meetings.
 - An employee failing to attend a Worker Safety Meeting shall not be permitted to
 perform any work that requires safety precautions that were discussed in the Worker
 Safety Meeting, until the employee has received the same instruction from the Worker
 Safety Meeting Instructor.
 - 3. The Contractor shall notify the Engineer at least 1 week in advance of each

scheduled Worker Safety Meeting. A record of each Worker Safety Meeting, including the topics covered, and a signed list of attendees, shall be prepared by the Safety Representative. Documentation of the Contractor and Subcontractor's Safety Meetings shall be made available to the Engineer upon request.

- 4. Each Worker Safety Meeting shall include instruction and discussion of safe working methods and applicable rules required for the safe performance of the work scheduled during the 2-week period following the Worker Safety Meeting.
- 5. The Worker Safety Meeting may be conducted by the Safety Representative or by a supervisor of the contractor qualified to perform the safety meeting as approved by the Safety Representative.

B. Safety Briefing

A safety briefing shall be held at the start of each workday to instruct all employees in safety precautions applicable to that day's work.

C. Management Safety Meeting

Safety will be on the agenda at every Progress Meeting with the Contractor and the Engineer. The Project Superintendent and Safety Representative shall attend.

3.10 MAINTENANCE OF SAFETY RECORDS

- A. The Contractor shall maintain the following Safety Records for a period of not less than six years after Construction Completion:
 - 1. All Health and Safety Plans and revisions thereto;
 - 2. Safe Work Plans;
 - 3. Daily Safety Reports;
 - 4. Worker Safety Meeting records;
 - 5. Training records and Certification Cards including, Safety Orientation, Roadway Worker and all other training provided to employees;
 - 6. Competent Person Designations;
 - 7. Material Safety Data Sheets;
 - 8. Accident/Incident reports including; Report of Injury, Accident Investigation Report, and OSHA Form 300
 - 9. Written notice of Citations, Suits, or Complaints; and
 - 10. Other compliance records as required by City, State, and Federal Agencies.

3.11 HAZARDOUS MATERIAL LABELING AND STORAGE

A. The Contractor shall ensure that each hazardous material is clearly marked or labeled in accordance with either the NFPA 704 Hazard Warning System (NFR Diamond) or the new color bar format (HMIG labels) as specified in the OSHA Federal Hazard Communication Standard (29 CFR 1900.1200). Each Hazardous material shall be stored in accordance with the manufacturer's recommendations, NFPA Standards, OSHA Standards, and all other storage provisions of the Contract.

3.12 PERSONAL PROTECTIVE EQUIPMENT (PPE)

- A. The Contractor shall enforce the following PPE requirements:
 - 1. Eye Protection -100 % eye-protection is required with anti-fog coating.

Outside of environments such as office trailers and closed equipment cabs (cranes, excavators, trucks etc), eye protection is continuously required. Eye protection must meet the ANSI Z87.1-2003 standards.

- 2. Hard Hats Worn at all times,
 - Hard hats shall be SEI Certified as meeting the ANSI Z89.1 requirements for Type I Class E protection.
- Safety Vests Safety vests shall be worn at all times and must meet ANSI 107-2004 (Class 3) standards
 - Hand protection/gloves must be worn when any manual work activity is associated with any jagged or sharp edges or where chemical protection is necessary. All gloves provided must match the task exposures, e.g. cut resistant for sharp object exposure, specific chemical resistance for chemical exposure etc.
 - Hand Protection Hand protection/gloves must be worn continuously when any tool is used either manual or powered, except if wearing gloves creates a greater hazard.
- 4. Foot Protection Worn at all times.
 - Work shoes shall be at least six inches high, preferably leather, and be completely laced or buckled. The shoe shall have definite heels that are no more than one inch high.
- 5. Work Clothing Worn at all times, and
 - Work clothing shall be suitable for heavy construction work (no tank tops or short trousers of any type)
- 6. Other PPE as required by safety and health standards.

3.13 ELECTRICAL

A. Ground Fault Circuit Interrupters designed for personnel protection shall be used on all electrical services used by workers. All other power sources, including portable generators (regardless of wattage), as well as extension cords plugged into permanent power sources, shall be protected by GFCI.

3.14 POWDER ACTUATED TOOLS

A. All operators of powder-actuated tools (Hilti, Ramset, etc.) shall be trained in the use of the specific tool by the manufacturer.

3.15 CRANE OPERATION

- A. Cranes shall meet the ANSI B30.5 Standard and applicable manufacturer's specifications.
- B. The Contractor shall make available copies of the following documents:
 - 1. Certification of Inspection.
 - 2. License of crane operator.
 - 3. Crane Manufacturer's Load Chart and Operating Manual for the Model and configuration of the crane.
- Contractor shall not hoist over a building without notification and permission of the building owner.
- D. Modifications or additions, which affect the safe operation of a crane, shall not be made without the Manufacturer's written permission.

3.16 RIGGING

- A. Rigging shall meet the requirements of the ANSI B30.9 Standard.
- B. Only riggers qualified pursuant to OSHA regulations shall be employed.
- C. Contractor's wire rope, chains, and fiber slings shall have their manufacturer's safe working load identified and attached to each item. The Contractor shall have each sling inspected and certified as prescribed by law and regulations. Slings shall be inspected by a competent person prior to each use. Defective slings shall be taken out of service. Safety latches shall be used.
- D. Only Alloy lifting chains of Grade 8 or better shall be used for lifting purposes.

3.17 WELDING AND CUTTING

- A. Welding and cutting equipment and operations shall meet the requirements of the ANSI Z49.1 Standard, and the requirements of this section.
- B. Gas welding and cutting equipment shall be listed by Underwriters Laboratories, (UL) or by Factory Mutual Laboratories, (FM).
- C. Flash back arrestors are mandatory at either end of all torch set-ups. Both hoses at each end of the apparatus must have flash back arrestors i.e. at the cylinder and the torch ends.
- D. Welding apparatus and equipment shall be inspected daily, prior to use. Defective apparatus and equipment shall not be used and shall be removed from service until repaired or replaced.
- E. Whenever the operator leaves the work area. the cylinder valves shall be closed.
- F. Torch valves shall be checked for leaks at the start of each shift.
- G. Only friction lighters or other approved devices shall be used to light torches.
- H. Splices or repaired insulation on arc welding cables shall not be permitted within 10 feet of the electrode holder. Cables shall be positioned so as not to interfere or create obstructions on walkways, scaffolds, stairs or ladders. Splices shall be equal to or greater than the original insulation on the cable.
- I. Portable welding screens or shields shall be used to protect other workers and/or the public in the immediate area.

- J. Fire extinguishers rated at 101b. ABC or larger shall be in the immediate area whenever welding or cutting is being carried out.
- K. When welding, cutting or heating is such that normal fire prevention precautions are not considered adequate, Fire Watchers shall be assigned and maintained for a minimum of 30minutesfollowingthecompletion of the last cutting or welding operation.

3.18 COMPRESSED GAS CYLINDER STORAGE

- A. All compressed gas cylinders shall be stored, used, and handled in accordance with the Compressed Gas Association guidelines, NFPA Standards, and the requirements of this section.
- Each compressed gas cylinder shall be considered to be either in transport, storage, or use.
 - 1. Compressed gas cylinders shall be transported and used in portable welding carts with the cylinders securely chained to the cart.
 - 2. An operable dry chemical fire extinguisher, rated not less than 100bs pounds of extinguishing capacity per extinguisher (i.e. 10lb fire extinguisher) shall be mounted on each portable welding cart in use.
 - 3. Valve protector caps shall be in place except when the cylinders are in use.
 - 4. Compressed gas cylinders in storage (full or empty) shall; be chained or secured in an upright position to a firm base, have the proper protective cap in place, and be protected from sources of heat. Compressed gas cylinders will not be allowed to be stored in any gang box.
 - 5. Mixed gases shall not be stored together.
 - 6. Improperly stored cylinders shall be immediately removed from the work area.
 - 7. Excessive or unreasonable storage of cylinders on the Site is prohibited.

3.19 FIRE PROTECTION AND PREVENTION

- A. Open flames and smoking shall be prohibited within 100' of flammable materials.
- B. In addition to notifying the Engineer, the written permission of the water utility shall be obtained before shutting off water servicing a fire hydrant.
- C. Prior written permission of the Engineer shall be obtained before blocking roadways, hydrants, post indicator valves, or access to fire fighting equipment
- D. The Safety Representative shall designate, as required. appropriately trained personnel to act as Fire Watchers. Fire Watchers shall be familiar with hazards that exist in the work area, and be trained in the operation of each type of fire extinguisher on the worksite.
- E. Flammable Liquids shall be stored in Factory Mutual (FM) approved safety cans equipped with self-closing lids and flame arrestors.
- F. Storage of flammable materials in or within 20 feet of structures shall be prohibited, unless in accordance with OSHA regulations.
- G. Work stoppage and shutdown of equipment shall be mandatory upon alarm of fire. Personnel shall report to the designated assembly area(s).
- H. Each temporary structure shall be constructed of fire rated material.

3.20 FALL PROTECTION

A. The Contractor shall comply with OSHA 1926 Construction Standards.

3.21 CONFINED OR ENCLOSED SPACES

- A. The Contractor shall adhere to all the requirements for entering a Confined Space as listed in OSHA CFR 1926 Defined as Construction Confined Space Requirements.
- B. NJTA Safety must be notified -in advance -of all permit required confined space entries.

3.22 SPILL PREVENTION, LEAKAGE CONTAINMENT, AND CLEAN~UP

A. The Contractor shall visually inspect all equipment for leak free operation on a daily basis. Any spillage shall be cleaned up promptly to prevent any release into the environment. Spill kits shall be maintained on site. The Contractor shall report all spills of Hazardous Materials including petroleum products to the authority having jurisdiction and the Engineer.

3.23 MOTOR VEHICLES AND MOBILE CONSTRUCTION EQUIPMENT

- A. Vehicle and equipment operators shall visually inspect and test essential controls, safety equipment, and safety devices before placing the vehicle or equipment in use. Construction equipment, whether owned, leased, or rented. shall be removed from service if unsafe.
- B. Modification of construction equipment affecting its safety shall not be performed unless approved in writing by the manufacturer.
- C. All motor vehicle and equipment operators shall be trained for the type of equipment they operate.

Self-propelled shall be equipped with backup lights and a reverse signal alarm. The alarm shall produce a 0.2 to 0.5 second audible warning within the initial three feet of backward movement of the vehicle on which it is mounted and at regular intervals thereafter of not more than three seconds, throughout the backward movement. The alarm shall automatically cut out when backward movement ceases. Sound intensity shall range from 90 to 100 dbs. at a distance of five feet from the alarm. Actuation shall be automatic by direct connection to any part of the equipment that moves or acts in a manner distinctive only of rearward movement of the vehicle, with no manual controls between the source of actuation and the alarm.

3.24 Excavations.

All excavations must be considered to be in type C soil.

END OF SECTION

DEFINITIONS

Authority Designated Safety Coordinator -OCIP Insurance Broker's Safety Representatives.

Daily Safety Report -A report that details all safety related activities and issues observed during the work shift.

Four Week Rolling Schedule -this is also referred to as the "Four week look ahead". It is typically the four week plan that the contractor generates which describes their work activities for the next four weeks.

Health and Safety Plan -A written plan that outlines the safety management systems that will be used by the Contractor to control losses at their job sites.

Personal Protective Equipment -Protective clothing, helmets, goggles, or other garment designed to protect the wearer's body or clothing from injury by blunt impacts, electrical hazards, beat, chemicals, and infection, for job related occupational safety and health purposes.

Safety Meetings -Any meeting that is conducted which contains relevant information regarding the health and safety of the workers and the general public.

Safety Orientation -A safety briefing that is given to each employee by the Contractor, prior to getting on the job site that identifies the specific hazards and exposures that the employee will be exposed to and the necessary methods of protection and control.

Safety Record -Any and all information related to safety activities.

Serious Accident -A Serious Accident shall be defined as an accident or incident that reflects more than \$100,000 in property damage, causes death, or causes serious injury, which shall include but not be limited to:

- 1. Fatalities.
- 2. Spinal cord injuries,
- 3. Bums to 10% of more of the body.

Work-shall have the same definition as in the Contract Documents.

Work Element(s) –Work Element is part of the Safe Work Plan. It is a description of sub-tasks and activities of the Primary Task. For example the Primary Task may be "The installation of a 24" storm sewer pipe", while the Work Element(s) would be to excavate, place gravel, set sewer pipe, etc.

Forms for Recording Work-Related Injuries and Illnesses

Dear Employer:

This booklet includes the forms needed for maintaining occupational injury and illness records for 2004. These new forms have changed in several important ways from the 2003 recordkeeping forms. In the December 17, 2002 Federal Register (67 FR 77165-77170),

OSHA announced its decision to add an occupational hearing loss column to OSHA's Form 360, Log of Work-Related Injuries and Illnesses. This forms package contains modified Forms 300 and 300A which incorporate the additional column M(5) Hearing Loss. Employers required to complete the injury and illness forms must begin to use these forms on January 1, 2004.

In response to public suggestions, OSHA also has made several changes to the forms package to make the recordkeeping materials clearer and easter to use:

• On Form 300, we've switched the positions of the day count

We've chrified the formulas for calculating incidence rates.

columns. The days "away from work" column now comes before

the days "on job transfer or restriction."

We've added new recording criteria for occupational hearing loss to the "Overview" section.

On Form 500, we've made the column heading "Classity the Case" more prominent to make it dear that employers should mark only one selection among the four columns offered.

The Occupational Safety and Health Administration shares with you the goal of preventing injuries and illnesses in our nation's workplaces. Accurate injury and illness records will help us achieve that goal.

Occupational Safety and Health Administration U.S. Department of Labor

What's Inside...

In this package, you'll find everything you need to complete OSHA's Log and the Summory of Work Related Injuries and Illness for the next several years. On the following pages, you'll find:

An Overview Recording Work Related Injuries and Illnesses.

Ceneral instructions for filling out the forms in this package and definitions of terms you should use when you classify your cases as injuries or illnesses.

How to Fill Out the Log — An example to guide you in filling

How to Fill Out the Log — An example to guide you in filling out the Log properly.

Log of Work-Related Injuries and
Illnesses — Several pages of the Log
(but you may make as many copies of
the Log as you need.) Notice that the
Log is separate from the Sammary.

Summary of Work-Related Injuries and Hinesses — Removable Summary pages for easy posting at the end of the year. Note that you post the Summary only, not the Log.

Worksheet to Nelp You FIII Out the Summary — A worksheet for figuring the average number of employees who worked for your establishment and the total number of bours worked.

OSHA's 301; Injury and Hibers Incident
Report — A copy of the OSHA 501 to
provide details about the incident. You
may make as many copies as you need or
use an equivalent form.

Take a few minutes to review this package. If you have any questions, state as online at www.osha. gov OF eat your focal OSMA office. We'll be happy to help you.
